① My parents think that I help them a lot in their works and managed to perform it very effectively and safely. They think I am good with study and have a good understanding of things and solves my problems very by my own after consulting with them. They think I am a responsible person as I listen to them and understand my responsibility what is required. They think that I do not take care of my health very effectively.

② My teachers have ~~for~~ multiple perspective about myself. As I love to do the task in a group and helps my juniors wherever required ~~me~~ with the study and other things like making them perform their task effectively. Teachers think I am good with studies and learn the things very quickly so they assign me the new projects and give me opportunities to take part in different things. My teacher thinks I get too engrossed in my task sometimes to make it more better.
